

Hight Storage Track System

P1-9

The solution to make space more efficient.

Provides instant access to inventory and allows maximum air and light circulation.

Designed to eliminate unnecessary aisles, free-up floor space and increase the number of shelving units that can be used in a designated area.

The overhead track assures smooth shifting of units, eliminates dirt and debris build-up that usually occurs with floor mounted systems and compensates for uneven floors.

Both stationary and mobile units are available with a variety of shelf sizes and finishes.

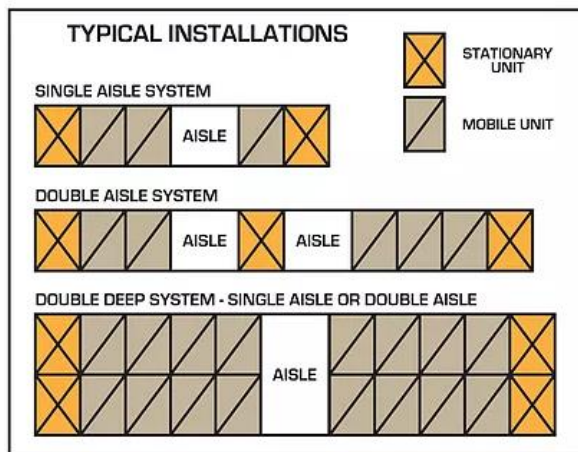

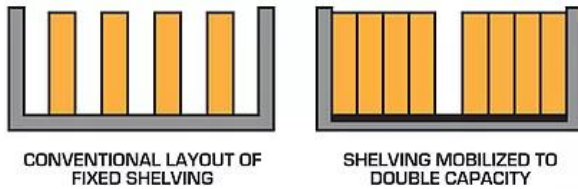

High Storage Track System

High Storage Track System

Storage capacity is increased by 25~35%. Design allows user to retrieve stored items quickly and efficiently. The overhead track system compensates for uneven floors. Stock picking made easy. The design improves organization, reduce labor costs, eliminates the need for costs of facilities expansion, and permits large volume purchasing-resulting in still greater or savings.

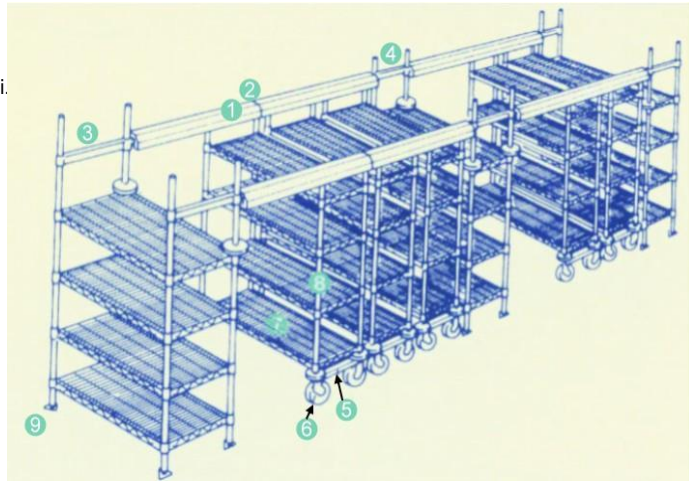

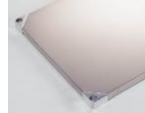

How it works:

• **Feature :**

- Capacity: Stationary unit 1000 kg / unit
Mobile unit 600 kg / unit
- Combine shelves of any size and different accessories, i.
Wire shelves, shelf dividers, ledges.
Make every storage space work for your own need.

No.	Description	Item No.	Size	Quantity	Usage	
1	Aluminum Overhead Track 	AC-4N	48"	2pcs/set	Overhead Track for mobile units which can extension to 21" long by means of JP-AC join parts.	
		AC-5N	60"			
		AC-6N	72"			
		AC-7N	84"			
2	Join track unit	JP-AC		4pcs/set	Increase the track length.	
3	Single side connection bar & 6" donut punper 	JP-18A	18"	2pcs/set	Connection stationary and mobile units.	
		JP-24A	24"
